## We can stop HIV, Iowa—by finding the HIV prevention methods that work best for us!

**Find a health care provider you feel comfortable talking to openly about your sexual health.**

If you don't feel your regular provider can provide the best care in this area, consider finding a second provider that is knowledgeable, inclusive and affirming who will provide you the best sexual health resources.

**Make prevention and testing part of your journey.**

Getting tested for HIV is the only way to know your status. And knowing your HIV status helps you choose options to stay healthy!

**Practice safer sex.**

Internal and external condoms can prevent HIV and other STIs when used properly, and using an appropriate lubricant is also helpful! You can also choose sexual activities with a lower likelihood of passing on an infection.

**Get in care. Stay in care.**

If you're living with HIV, getting and keeping an undetectable viral load helps you stay healthy and prevents transmission to your sex partners.

**STOP HIV IOWA**

**Why Public Notice Should Remain in Newspapers**  
Newsprint is inherently superior to the internet for public notice because reading a newspaper is a serendipitous process.  
We find things in newspapers we weren't expecting to see. On the internet, we search for specific information and ignore everything else.  
Governments aren't very good at publishing information on the internet. Unlike newspaper publishers, public officials aren't compelled by the free market to operate effective websites.
