Breast Cancer Won't Wait. You Shouldn't Either.

Mammography is the single most effective method of screening for breast cancer. At Palo Alto County Health System, we utilize Genius 3D Mammography testing, which is specifically designed for higher accuracy and fewer false positive results. The Genius exam is a fast, non-invasive type of breast imaging that uses a low-dose of x-rays to examine the breast for abnormalities, and can show changes in breasts up to two years before patients or physicians can physically detect them! We encourage women to start having mammograms at age 40, or younger, depending on potential risk factors for developing breast cancer. Schedule your mammogram appointment now, and don't put off until tomorrow the preventive measures you can take today!

For more information or to schedule a mammogram appointment, please call 712-852-5500.

Thanks for Being There for Us!

A heartfelt thank you to the passer-by who called the ambulance for me on Monday.

A sincere thank you to the EMTs for their kind and gentle care in transporting me to the hospital. And, thank you also to the ER staff for their skillful care. Last, but not least, a special thank you to my sister for her care and concern.

Gratefully, Marion Lewis

Why Public Notice Should Remain in Newspapers

Since the first U.S. Congress, public officials have understood that newspapers are the best medium to notify the public about official matters because they contain the **essential elements of public notice:**

- Accessibility
- Independence
- Verifiability
- Archivability

Publishing notices on the internet is neither cheap nor free
