Why Public Notice Should Remain in Newspapers

Newsprint is inherently superior to the internet for public notice because reading a newspaper is a serendipitous process.

We find things in newspapers we weren't expecting to see. On the internet, we search for specific information and ignore everything else.

Governments aren't very good at publishing information on the internet. Unlike newspaper publishers, **public officials aren't compelled by the free market to operate effective websites.**

World AIDS Day is December 1
You help us keep moving forward when you **talk, test, treat.**

talk
Talk with your partner **before** having sex.
Talk about **when** you were last tested and suggest getting tested together.
Talk to your healthcare provider about your sex life. Ask them about HIV and STI testing: including what tests you need and how often.

test
Get tested! It's the only way to **know for sure** if you have an HIV or another STI.
Many STIs **don't cause any symptoms**, so you could have one and **not know**.
If you're not comfortable asking your regular provider for an HIV or STI test, find a clinic that provides confidential testing that is free or low cost.

treat
All STIs, including HIV, are treatable. If you test positive for an STI, work with your healthcare provider to get the right treatment.
If you test positive for HIV, your provider or testing location will help connect you to treatment & resources!
Ask about partner services to get your partner tested and treated. Avoid having sex until you and your sex partner both complete treatment.
