Concussion Information

Tennessee law and TSSAA policy mandates that certain procedures be followed when signs, symptoms, and behaviors consistent with a concussion are observed in practice or competition. Tennessee state law also requires annual training on concussions for all youth sports coaches. Educational materials must also be reviewed and signed by each student athlete and his/her parent or legal guardian. The Tennessee Department of Health has also developed a set of guidelines for students who have suffered a concussion as they transition back to the classroom.

COVID-19 Return to Play Guidelines

The families of students who have tested positive for COVID-19 should utilize the following flow chart linked below to determine whether or not they need to seek clearance from a medical provider prior to resuming activities with his/her team. A complete summary of the revised recommendations can be found here: [NFHS/AMSSM Updated Cardiopulmonary Considerations for](#)

[COVID-19 \(January 2022\)](#). All coaches and students who are confirmed or suspected positive for COVID-19 should follow the [recommendations for release from isolation from the CDC](#) when considering a return to practice or activities.
